

Coronavirus Equity Considerations

NAACP

Coronavirus Equity Considerations

The Imperative for Civil Rights Advocacy, Monitoring, and Enforcement

A widely impactful public health crisis is upon us. The tentacles of its impact are many and pervasive, from social, to economic, to environmental implications. As a civil rights organization and as stewards of human rights, this outbreak calls on us to maintain vigilance and lift our voices to demand the policies and practices that will preserve the wellbeing of all.

Already we've seen many equity and justice challenges that must be addressed before they worsen and cause further damage. We must recognize and stand up against racial/ethnic discrimination and stereotyping. Our federal, state and local governments must ensure necessary policies and practices are in place, so that needed information, training, resources, and care are available equitably and reach all people in all communities. As we think about the upcoming Census and elections, the novel coronavirus [pandemic](#) underscores the ongoing need to push for affordable, quality health care coverage; a well-trained, diverse health care and medical research workforce; and accessible sources of care (hospitals, Federally Qualified Health Centers) for all.

At this same time, even as we advance changes in response to what's before us now, we must examine the systemic inequities that have exacerbated impact and ensure that we begin to enact transformational societal shifts to address the root causes of vulnerabilities and systems failure.

KEY CONSIDERATIONS:

I. Racism and stigmatization have increased, particularly towards the Asian and Asian American population.

- a. [Coronavirus: The latest disease to fuel mistrust, fear, and racism](#)—The Conversation
- b. [What historians hear when Trump calls coronavirus 'Chinese' and 'foreign'](#)—CNN

Civil Rights Advocacy Recommendations

The recommendations below are largely only short-term measures to meet immediate needs of those who are most vulnerable. To achieve true justice, we must address the systemic underpinnings of inequity as a constant struggle in the foreground, even as we focus on optimizing emergency service provision so that vulnerabilities do not become liabilities.

The [COVID-19 Stimulus Package](#) begins to address some of these issues, but falls short in multiple areas.

Otherwise, as an overarching concern, as recommended by the [Open Letter to Mike Pence from Legal and Health Experts](#), the federal government and federal, local, and state agencies must minimize disruption to government activities throughout the epidemic to continue providing public services to those who need them. Government must have a coordinated plan for keeping its operations running in the event of work absences. Priority should be given to essential services and support to the public, for example ensuring that Social Security, Supplemental Nutrition Assistance Program, Temporary Assistance to Needy Families, Low Income Heating and Energy Assistance Program, veterans' benefits, and other forms of support are not disrupted.

Furthermore, in states where there are pre-emption restrictions, there should be consideration of lifting this prohibition for municipalities that are COVID-19 hotspots to allow for greater flexibility in implementing measures to flatten the curve and ensure the health and safety of residents. For example, given the way that COVID-19 targets the lungs, municipalities that have previously been prohibited by prevention from implementing clean air ordinances, should be allowed to do so in order to make the air breathable for those with respiratory limitations resulting from the coronavirus and otherwise.

Finally, as a blanket measure as we adjust to this new temporary normal while trying to advance continuity for all critical aspects of life, we must institute FREE Universal Broadband Access. This is crucial for students and for others to be able to access information to protect themselves, find resources, convene virtually, including critical populations such as folks in need of narcotics anonymous, alcoholics anonymous, and other meetings, etc.

Specific advocacy recommendations in response to the ten identified equity implications are as follows:

I. Racism/xenophobia/stigma

a. Short term:

- i. Advocate for federal, state, and local governmental officials dominating the airways to lead on narrative shift with messaging to include: 1) The virus is the enemy, not the person who is infected; 2) This outbreak could have started anywhere. It just happened to have started in China through no fault of the people of China; 3) This

- outbreak has nothing to do with the LGBTQ community and whom they choose to love. 4) We are all in this together! We are stronger together. Only through collective, global cooperation can we contain this outbreak!
- ii. Advocate for support for racial justice groups.
- iii. Advocate for resourcing of LGBTQ rights, support, and service groups.
- b. **Long term:** Eradicate racism. Eradicate Xenophobia, Eradicate homophobia.

II. Vulnerable Populations

- a. **Incarcerated persons:** Advocate for: 1) Facilities should take all precautions in cleaning/sanitation with non-toxic cleaning supplies; 2) Incarcerated persons must be prioritized for testing, given differential vulnerability. 3) Quality healthcare should be afforded to those who are infected. 4) Any quarantine efforts should not result in persons being put into more restrictive environments, such as solitary confinement cells;

Furthermore, we must advocate to ensure that the [Families First Coronavirus Response Act \(HR 6201\)](#) resolves several limitations:

- i. No new prison sentences or arrests for misdemeanor convictions.
- ii. Implement a video visiting platform where video/virtual visits can be conducted from home instead of requiring the family member or friend to travel to a location (usually a nearby state prison) where the video visit is conducted. It's imperative that people be allowed to stay connected with family during this time, and with people unable to visit state prisons to conduct video visits for the near term, video visits from home will be the only means for families to stay in contact.
- iii. Health Care & Sanitation
 - 1. Provide updated information to all incarcerated people and staff on how to reduce the spread of COVID-19 and institute enhanced cleaning protocols for all state correctional institutions to reduce the presence of COVID-19 on surfaces inside of prisons.
 - 2. Healthcare in prison and outside of prison should be completely free and people should be encouraged to seek treatment if they show symptoms of COVID-19. All co-pays should be eliminated and people should be provided all medicines free of charge. Volunteer physicians should be sought in communities surrounding state prisons to assist in treating incarcerated people who contract COVID-19.
- iv. Prison Release & Re-entry
 - 1. Release as many people on parole as quickly and safely as possible. Criteria should be established for people who have hit their minimum dates and are now parole-eligible that gives them the presumption of parole if they have been misconduct free for a certain amount of time or have demonstrated rehabilitation in other measurable ways. Parole hearings should be expedited for all incarcerated people. Hearings should be waived for people meeting the categories of presumption of parole.
 - 2. Explore emergency measures to release as many elderly people, people in prison for violating technical terms of probation, and people with comorbidities and complex medical needs from prison as quickly and safely as possible. The most vulnerable are obviously the elderly, as well as people

- with cardiovascular disease, diabetes, chronic respiratory illness, high blood pressure and cancer.
 - 3. Institute emergency measures to ensure people that coming home have access to re-entry support which will provide them healthcare, housing and all the things they need to be successful and safe in re-entry.
 - 4. Re-establish a system of furlough. In societies around the world mass furloughs are being issued as a way to combat COVID-19.
- b. ***Grandparents at risk via childcare:*** Advocate for expanded parental leave benefits so that grandparents do not have to be in the position of having to do emergency childcare. This is a matter of workers' rights and corporate social responsibility. This can also be a call to federal government to develop a mechanism to provide a short term benefit (perhaps through the unemployment system so that a new mechanism doesn't have to be developed) for workers in small businesses to be able to have some support when they are unable to work.
 - c. ***Immigrant population and English as a Second Language Speakers:*** Advocate for: 1) A sanctuary model to be employed regarding testing and treatment of immigrant populations with no fear of detention. Clear messages should go out directing that ICE will not be called for anyone seeking health care. 2) Quarantine sheltering should be provided with no questions asked before, during, or after and this message needs to be very abundantly conveyed so that persons do not fear seeking assistance. 3) Trusted institutions in the community should be resourced, including training, equipment, and supplies, to provide services including testing, health care, and sheltering/quarantine to this differentially vulnerable population that will have trust issues with strangers despite all assurances. 4) Provision of real time translation of all materials so that the critical health and safety information is made accessible to all.
 - d. ***Elderly Persons/Persons with Special Health Needs:*** Advocate for: 1) Municipal and community level mapping of vulnerable households; 2) Prioritization for universal routine testing, monitoring, and treatment; 3) Special delivery of basic needs (food, medicines, supplies, etc.) through mobile units; 4) Training on staying safe and healthy.
 - e. ***Nursing home residents:*** Advocate for: 1) Prioritization for universal routine testing, monitoring, and treatment; 2) Capacity and resources to remove and support infected persons in quarantine so that they do not infect other residents and/or staff members; 3) Resourced training and supplies for staff and management;
 - f. **Persons Experiencing Homelessness**
 - i. **Short term:** Advocate for: 1) Provision of universal emergency sheltering services: 2) Prioritization for universal routine testing; 3) Mobile basic needs delivery, including food, clothing, and sanitation supplies, for those who do not want to accept emergency sheltering services; 4) Training on staying safe and healthy;
 - ii. **Long term:** Eliminate homelessness—housing for ALL!
 - g. **Native American/Indigenous Nations/People**
 - i. **Short Term:** Advocate for: 1) Federal and philanthropic support for Native American/Indigenous led groups and nations so that they can determine and implement solutions that work for them.; 2) Increased resources to Indian Health

Services as well as provision of mobile service units or temporary health facilities for rural areas.

- ii. **Long Term:** Advocate for: 1) Adherence to treaty rights; 2) Granting of all federal recognition petitions.

h. **Women**

- i. **Short Term:** Advocate for financial support for gender justice groups so that they can determine and implement solutions that work for them.
- ii. **Long Term:** Eliminate sexism and misogyny.

i. **Low Income Communities**

- i. **Short term:** Advocate for: 1) Provision of universal emergency sheltering services; 2) Prioritization for universal routine testing, monitoring, and treatment; 3) Mobile basic needs delivery, including food and sanitation supplies; 4) Moratorium on water shut offs, energy shut-offs, evictions, etc.; 5) Equitable public transit to be sustained during and after the pandemic, with ample availability during the pandemic so that riders can practice physical distancing;
- ii. **Long term:** Establish a universal basic income, which can be implemented starting now.

Furthermore, we must advocate to ensure that the [Families First Coronavirus Response Act \(HR 6201\)](#) resolves several limitations:

1. States should be required to use federal-only Medicaid dollars to cover coronavirus testing for the uninsured, especially to protect state budgets and ensure testing to all at-risk persons as needed.
2. Ensure that funding to reimburse providers for testing the uninsured does not become a boon for well-resourced health care settings and systems, to the disadvantage of community health centers and public hospitals.
3. Regarding the US territories, increased Medicaid funding must correspond with the need for services.
4. Further expansion of health care coverage to the uninsured and underinsured.
5. Ensure that food assistance provisions are not used to undermine progress made in nutrition guidelines.
6. States should be required to adjust their SNAP programs to provide additional support to families with eligible school-age children.
7. State work requirements for SNAP recipients should be waived along with federal work requirements.
8. Increases in nutrition assistance for the US territories must include the USVI and Guam (not listed in the summary), with an increase to the total allotted so no territory is shortchanged.
9. The bill must declare a moratorium on utility shut-offs, including water, electricity, gas/oil, etc.
10. Provisions must include cancellation of all student loan debt, particularly given the long-term impacts of this crisis on the economy.
11. The bill lacks any housing proposals. Recommend the following:

- a. Moratorium on foreclosures and evictions:
 - i. Require loan forbearances for those affected by the pandemic
 - ii. Interest and fees should not be charged
 - iii. Forbearances should stay in place for an extended period to allow homeowners to rebuild their savings
 - iv. Payments should be added to the end of the loan; mortgagors should not have to play catch-up
 - v. Federal government should make sure investors are paid during this period
 - b. Suspend all evictions in process
 - i. Moratorium should include evictions for tax liens and utility payments
 - c. Moratorium on negative credit reporting
 - i. If credit is not affected once income is back in place, economic growth can continue
 - d. Suspend all current and pending debt collection efforts
 - i. Release garnishments
 - e. Increase protections against predatory lending and scams geared towards seniors
- iii. **Long term:** Eradicate poverty.

III. **Workers' Rights**

a. ***Service Workers/Cleaning workers/Domestic workers***

- i. **Short term:** Advocate for: 1) Stringent adherence to the standards delineated in the Occupational Safety and Health Act. 2) Provision of training and safety gear as well as non-toxic cleaning materials. 3) Prioritization of provision of routine testing to this differentially vulnerable group; 4) Provision of quality treatment and quarantine in adherence with the standards of the Quarantine Bill of Rights referenced below. 5) Support for groups such as the National Domestic Workers Alliance and others worker led groups;

Furthermore, we must advocate to ensure that the [Families First Coronavirus Response Act \(HR 6201\)](#) resolves several limitations:

- 1. The bill provides paid sick leave, but not for all.
- 2. It's estimated that about 7 million workers at big companies/firms might fall through the cracks since they are excluded from the bill.
- 3. While the House bill calls for two weeks of paid sick leave at 100% of an individual's salary followed by 12 weeks of pay at 67% salary under the Family and Medical Leave Act, the concern is that if people are asked to stay home beyond that time will there be a caveat for extending those provisions? The bill must include clear language on this issue.
- 4. The bill language must provide clarity for small businesses regarding paid family and medical leave (FMLA). These employers can apply for an exemption through DOL from having to provide FMLA if it would jeopardize the businesses' ability to stay viable. It is not clear how lenient the

Administration will be. There needs to be an upfront commitment from the Administration.

5. It excludes large companies, with staff in excess of 500, and its policy for paid sick leave rests totally with the companies' preexisting policies. According to the Department of Labor, 89% of workers at these companies have access to an average of 8 days which is below the 14-day quarantine protocol. The assumption is that companies will step up and provide additional time, but it's currently at the company's discretion. Essentially, not all policies are equal. The bill should not exclude holding big businesses responsible in ensuring the economic security of employees.
- ii. **Long term:** Advocate for 1) Strengthened OSHA standards to adequately respond to extreme circumstances such as the COVID-19 Outbreak; 2) Health Care for ALL; 3) We need more distributed, employee ownership now!

b. Healthcare workers

- i. **Short term:** Ensuring HR 6201 resolves several limitations:
 1. The bill does not provide expanded protections for workers on the frontline of this pandemic. It also needs to expand the definition of "first responders" to include healthcare workers, daycare providers, and even grocery store workers.
 2. Benefits should include: Expedited Testing; Access to Protective Equipment; and Financial incentives similar to "combat pay."
 3. There is no information about increased funding for protective equipment for medical providers and other health care workers, emergency personnel, and other essential personnel.
 4. The proposed mask liability cannot excuse or justify the use of subpar products that put providers and patients at greater risk.

c. Workers without paid leave

- i. **Short term:** Advocate for 1) Provision of testing; 2) If infection is diagnosed, provision of quality treatment and quarantine in adherence with the standards of the Quarantine Bill of Rights referenced below. 3) Establishment of a system which allows workers without paid leave to still draw an income if they are unable to work due to the coronavirus, potentially through a mechanism such as the unemployment system. 4) While the Senate is working on an economic stimulus package to include in the Senate bill they should consider:
 1. Expanding unemployment insurance to workers who are idle during this period of self-containment and waive all waiting periods.
 2. Enact emergency paid sick leave programs that cover all workers in businesses of all sizes.
 3. Provide monetary financial support to small businesses/entrepreneurs/independent contractors.
- ii. **Long term:** Advocate for; 1) The establishment of a paid leave system for all workers. Support HR 1185 (FAMILY Act) which would provide up to 12 weeks of partial pay for family health emergencies, including pregnancy and childbirth

recovery; the serious health condition of a child, parent, spouse or domestic partner; the birth or adoption of a child; and/or for particular military caregiving and leave purposes.; 2) Health care for ALL.

d. **Gig economy workers**

- i. **Short term:** Advocate for 1) Access to training, equipment, and supplies to minimize exposure/contact with the virus. 2) Provision of testing; 3) If infection is diagnosed, provision of quality treatment and quarantine in adherence with the standards of the Quarantine Bill of Rights referenced below. 4) Establishment of a system that allows workers without paid leave to still draw an income if they are unable to work due to the coronavirus, potentially through a mechanism such as the unemployment system.
- ii. **Long term:** Advocate for: Health Care for ALL.

IV. **Democracy**

- a. **Census**—Advocate for: 1) Extensive training of outreach workers on safety, sanitation, and health measures; 2) Ensure the data collection for the Census through online and telephone enumeration, extend voting hours, and minimize large gatherings.
- b. **Primaries**—Advocate for: 1) Extension of voting hours; 2) Thorough cleaning of all surfaces of polling places including cleaning of each booth between each voter; 3) Staggering of voting periods and amount of people in each period to minimize lines in close quarters; 4) Provision of thorough training of poll workers; 5) Explore alternate means of voting to ensure safe, universal participation, including the possibility of drive-thru voting similar to how ATM machines are set up, having voting booths.
- c. **Political gatherings**—Advocate for: 1) Minimization and/or cancellation of all large gatherings; 2) Explore models for virtual town hall meetings via social media and otherwise until the outbreak is contained.

V. **Toxic Cleaning Materials**

- a. **Short Term:** Advocate for: 1) Agencies such as the Centers for Disease Control and others to emphasize non-toxic cleaning products; 2) Businesses, including airlines, transportation companies, etc. be required to only provide non-toxic cleaning products for worker usage.
- b. **Long Term:** Significantly increase the stringency of the Toxic Substances Control Act (TSCA) Chemical Substance Inventory and maintain thorough monitoring and enforcement.

VI. **Schools (Exposure as well as Education, Meal, and Housing Interruption)**

- a. **Exposure**—Advocate for: 1) Equal standards of sanitation, safety, and health in all schools; 2) Training of all school personnel and students on healthy practices; 3) Provision of equipment and supplies necessary to maintain health and safety standards; 4) Routine testing when kits become available; 5) Execution of appropriate containment processes if an infection is discovered, while ensuring the centering of equity, justice, dignity, safety, and health.
- b. **Loss of free meals for low income students**—Advocate for provision of food assistance to families enrolled in the free meal program via mobile delivery, food vouchers, or some other mechanism.

- c. **Housing insecurity for students dependent on university housing**—Advocate for establishment of a system by which students can register for housing assistance through Stafford Act provisions.
- d. **Education Interruption**—Advocate for: 1) Education continuity to the highest standard possible in the event of the need for school closure due to infection or risk. 2) Establishment of alternative means of education that are accessible to all and of comparable quality to the in-classroom experience.

Furthermore, we must advocate to ensure that [the Families First Coronavirus Response Act \(HR 6201\)](#) resolves several limitations:

- i. This bill does not include provisions tied to technology and student learning, a gap that must be addressed.
- ii. Many schools do not yet have access to or are not yet using technology in ways that can improve learning on a daily basis. Many homes in low-income and rural communities do not have the necessary technology. Teachers must be trained and supported as well.
- iii. Supporting learners in using technology for out of school learning experiences is often a missed opportunity. This underscores the need to accelerate and scale up adoption of effective approaches and technologies. With schools being closed, now is the time.
- iv. There's a full package of needs that must be addressed for quality distance learning: Access to high-speed internet, broadband in your community first; platforms to engage classes remotely with appropriate functionality for learning; resources to set up infrastructure, both internal and external; and technical assistance/support for setting up and using the tools.
- v. For many, on-line instruction may not be possible in the short run because of all the resources it requires. More than 917,000 households in NYC, or 29%, lack broadband digital access. Using printed materials and phone calls, the old-fashioned way, will be necessary for many students in the short term.
- vi. The National Education Technology Plan is the education technology policy document for the United States, a plan that can at least serve as a starting point to address the digital divide and the digital use divide.

VII. Testing and Care Access

- a. Advocate for funding to ensure an effective health infrastructure including health departments and the US Public Health Service whose role is critical for responding to urgent and ongoing challenges to the public's health and promoting health for us all.
- b. Advocate that as testing kits become available, vulnerable groups/populations are prioritized for testing and care.
- c. Prioritize under-resourced facilities to ensure limited hospital supplies are equitably distributed.

VIII. Quarantine Policies and Practices

- a. Advocate for the establishment and enforcement of a Quarantine Bill of Rights that sets forth conditions by which one can be remitted into quarantine, the conditions of quarantined, and

the criteria for release while centering equity, justice, dignity, safety, health, comfort, and self-determination throughout the continuum. Included in this bill of rights should be the following excerpted from an [Open Letter to Mike Pence from Legal and Health Experts](#)— "Individuals must be empowered to understand and act upon their rights. Information should be provided on the justification of any mandatory restrictions as well as how and where to appeal such decisions. They should be afforded procedural due process, including universal access to legal counsel, to ensure their claims of discrimination or of hazardous conditions associated with their confinement are adjudicated."

IX. Restrictive Immigration Policies and Practices

- a. Advocate for: 1) Establishment of sanctuary municipalities and states; 2) Repeal of the travel ban; 3) Repeal of the restrictions on provision of healthcare to immigrants; 4) Improved conditions at the border in accordance with stringent public health standards.

X. Denial and Misinformation Impacts

- a. **Short term:** 1) Advance a counter-narrative/vigilant refuting of misinformation and replacing with science-based facts. Advocate for federal, state, and local officials to only present factual information to the public.
- b. **Longer term:** 1) Advance litigation for willful misleading of the public for political gain while jeopardizing the wellbeing of the nation.

Questions we must ask ourselves as implications of this outbreak continue to unfold:

1. How are we managing the mental health toll of extreme anxiety and fear?
 - a. [Mental Health Professionals are Preparing for an Epidemic of Anxiety Around the Coronavirus](#)—Mother Jones
2. Flooding and tornado season is upon us. What are the implications given compounded impact on vulnerable communities that are also often in the flood plains or have poor drainage systems, or fragile housing stock? What about the impacts on the practices of large, confined gatherings of people in shelters and disaster recovery centers?
3. How do we maintain rigorous grassroots mobilization on other fronts of struggle amidst the coronavirus crisis?
4. In addition to [Federal relief](#), how do we anticipate and begin to mitigate against the shocks to the economy that will inevitably hit the most vulnerable communities and population groups first and worst?
5. How do we begin a conversation around the connection between viruses like COVID-19, antibiotic resistance, factory farming, globalized industry, and habitat destruction from rapid urbanization?
